

Sends Sharpest Letter To U.S. President

SATURDAY, SEPTEMBER 20, 1958.

Day

DRITAIN'S Liberal Party, inspired by recent byelection successes and fired by the prospect of resurgence of their party after more than three decades in the doldrums, are meeting in Torquay this week. Their decisions will have a vital bearing on whether they are to remain the dogsbody of British politics or emerge as a force to be reckoned

Let's Take Word

Thompson

PIECEE: This word was used to replace all classifiers by Pidgin-speakers. Earlier pidgin used it for inanimate things and reserved-fells for animals (including humans) as happens today in Melanesian Pidgin. Piecee has still great vigour Hongkong, cepecially among amahs. Giles quotes: You catchee one piecee wife? Are you married? (Have you a wife?)

PIK NIK: I give you one guess.

POMMELO: The shaddock or citrus decumans, largest of the citrous fruits. It is also spelt pummelo. The name seems to have come into a certain amount come from India and although many related forms occur its of prominence because etymology is still held to be doubtful. Some of these names are pompone and pampet-mousse in French India; pumpledon and Nottingham. They nose, pumplemuse, pummel-nose and even pimple-noses in earlier British records. As early, as 1661 it was spelt Pumpelmoos by the Dutchman Schulzen. Hongkong Portuguese call this fruit jambon. of low intellects.

PUNKA: An air-cooling device brought to China by the Europenns. It was once Hongkong's word too. The word descends ultimately from Sanskrit pankha. Giles quotes the tive observer I believe they following oddly-expressed statement from The Pioneer are being grossly flattered "Punksh says that in its own country it is pulled by a string having blame for the and is used to ventilate a room."

PUNT: A Chinese inch: ta'uen. Punt (punto from the Portuguese ponto) originated in Canton. It was the tenth part of a covid (itself of Portuguese origin). ~

PUNTI: "Indigenous Cantonese-speaking shore-dwellers, particularly in contrast to Hakkas from whose language, the expression is taken." This definition is taken from Hongkong Government Annual Departmental Report by the District Commissioner, New Territories, 1955-58, which also contains a map which indicates in colour the distribution of elsewhere. Punti and Hakka villages in the New Territories. In the same report it is stated that the Punti dialect belongs to western section of the Yuen group of Chinese dislects.

PAILAU: A triumphal archway. The Commissioner of Police, Hongkong, recently issued a circular to registered societies, trade unions and other organisations forbidding "the hanging across any street, road or footpath of any decoration, banner, sign or pallau" and the "crection of pallaus or similar structures. . . . without the approval of the Director of Public Works." The name, of Chineses origin, is composed of elements meaning tablet and stage or erection. Yule and Burnell noted that the construction was derived from India with Buddhism see Indian and Eastern Architecture, pp. 700-702). The Japanese Toril are said to have the same origin.

RATTAN: The common cane, often used in the manufacture of light furiture, etc. The word is of Malayan origin: rotang or rotan. The form rota has long been in use in the Portuguese of the East and still survives in the dialect of Hongkong.

RICKSHA: This well-known word is a shortened version of the Japanese jin-riki-sha 'manpower-vehicle.' The ricksha has given way to pedal or powered vehicles in most parts of the East. The New English Dictionary quotes the Pall Mail Magazine of 5th August, 1887: "There can be no impropriety in ladies. . . . riding in our easy and delightful Rickshas" and again the issue of 3rd February, 1890 which speaks of "Chumming with Chinamen, jinrickshaing with Japanese.... palayering with Peruvians," It is claimed that the ricksha was first used in Japan around 1876 and that its inventor was an American missionary by the name of W. Goble.

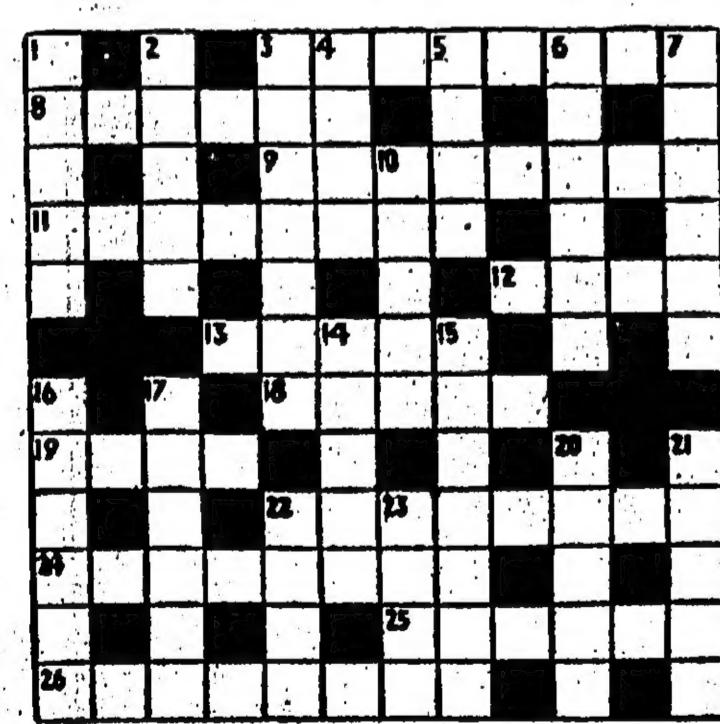

BAAM MAN CHI: This is the form in which English "sandwich" is borrowed by the Cantonese dialect of Hongloong. .

SAAM PIN TSAU: Champagne. The first two elements represent the borrowed foreign word.

WHITE SALMON: A fish, eleutheronema tetradactylus, also known as thread-fin. Local fisherman call it Ms You which Herklots and Lin translate as "Horse's friend."

SAMPAN: This word is applied by Europeans in the China seas to any small boat of Chinese pattern. It is written in Chinese with the characters for "three" and "board." In Annamite it is tam-ban which is obviously related. The name was known to Europeans in the sixteenth century—compan is documented for Spanish and champana for Portuguese. There is some doubt as to the origin of this name which may be in Malaya rather than in China. The modern form goes back only as far as the early seventeenth century.

PORN today, you are essentially an individualist. You do as you D please about things and care very little what anyone says about it-or, for that matter, about you.

You are alert and have a progressive point of view. You are quick to see a new approach to a problem and will grasp it immediately. You are always doing the unexpected and coming out successfully. You are adventuresome and will take a risk to advance your position, rather than sit back and wait for things to come to you more slowly.

Because of this, your life may be full of movement and excitement. There will probably be alternating cycles of good and ill all of "Out of a tin you are out." it fortune and you must learn to lie low when the tide is running against you. No use wasting energies just to make a splash. This will be the most difficult lesson for you to learn - not to waste energy. You have tremendous stores of mental and physical vitality, but if you are a spendthrift, there could come a time when you will have to take a prolonged rest to recoup.

> You women have a great deal of personal charm and are attractive to members of the opposite sex. You have good minds, but are disclined to use them! You think beauty is its own reward. There used to be a time when a pretty girl could be "dumb" and get away with it. These days, brains as well as boauty count.

You are essentially a home-maker and will be happiest if you washes with an Elvis Presley- wed while quite young and have a family of your own growing up like motion which shakes the around you. This will be your best role in life and the one which will give you the most happiness.

ELEPHANTS

, Ivan T. Sanderson, Casson,

ELEPHANTS, "By Richard Carrington. Chatto. 25s.

T the age of nine Mr Ivan Sanderson wriggled wear, stockings, cigarette lighters through the main artery of a 70 ft. whale and seated

himself inside its heart. Such a bizarre experience. I imagine, must affect you powerfully in one of two ways; ether you will be forever tascinated by whales or else you will never wish to see one again. '

he kept heaps of masks, false . Mr Sanderson was fascinated and when you read some of the extraordinary facts in his book, you are hardly surprised that he was.

Binck right whales for example, have on their snouts an excrescence of homy skin about two feet in diameter, riddled with tunnelling parasitic worms and garlanded with hanging barnacles, which is known to the whaler as its "bonnet."

So skittish....

Humped-backed whales, when skittish and loll side by side on the surface of the sea giving one another affectionate 10-ton slaps which can be heard for miles

around The strength of whales ! immense — a harpooned whale once towed a 90th twin-acrew steam choser-ship, cumning full astern for soven hours at eight

Mr Sanderson's book, however, is not so much a study of whales as a detailed history of whaling. It is a story of increasigny efficient methods of butchery, the latest of which was an attempt to kill whales by drop-ping bombs on them.

As mammals, they are prob-ably capable of as much suffering as a dog or a horse. I shut the book wishing profoundly that modern chemistry would been devise methods of synthesising the oils and fats that whales possess in such abundance so that soon the slaughter which Mr Sanderson describes . so . vividly will no

longer be necessary. Killings over?

Mr Richard Carrington has a happier story to tell about the largest of all living land animals, the elephant. He seems hopeful that over a greater part of Africa at least, the massacre of elephants wrought by big game hunters and ivory peachers has largely been stopped.

One popular belief has survived scientists probings. A German professor, trained a five-

man professor trained a Aveyear-old elephant to distinguish between one box marked with a square which contained food, and another, marked with a

circle, which was empty.

The elephant needed 330 trials before it grasped the distinction, but eventually it learned to tell the difference between 20 such

HECTOR CHAUVIN was born in London of a musical family. At the age of seven he started to learn the plano and at the age of ten' started to help his father with the maintenance with the family car and motor # cycle. These two interests music and mechanics have stayed with him ever since as the following date lines reveal: Age 13, started unofficially to ride father's 14 acquired own motorcycle (350 cc. Raleigh 2 speeds, chain and belt

transmission). At Prep school he won music prizes. At Tonbridge school music began to give way to mathematics and engineering. Life began in earnest at the age of 20 when as a Subaltern in the Royal Artillery, he was involved in a road accident and bought his first car with the damages received. The link between music and mechanics continued, for while recovering from the accident he played the organ for six months in the Astoria Cinema in London.

ROUND-UP

TRAMPED IN DARK

THE last 41 years has meant a 145,000-mile tramp for Mr Albert I Haselden, of London Road, Higham-every mile of it in the dark. Mr Haselden, who has retired at 68 became watchman of Higham Tunnel, which runs 21/2 miles between Higham and Strood stations, on the Charing Cross-Chatham line when he was 22 years old. Ever since he has averaged about 70 miles a week walking up and down checking on the safety of the tunnel which is used by 80 trains a day. He has dealt with falls of rubble, people who have fallen from trains and all sorts of animals which have found their way there. Fifteen times during the war he guided out people who had walked in during the blackout imagining that they were walking away from one or other of the stations at either end.

MOTORED 60 YEARS

IPSWICH motorist 79-year-old Mr Ebenezer Hook's claim to being I a "vintage" motorist rests on the fact that he first drove in 1897. He then took the wheel of a 20 m.p.h. single-cylinder Benz. Mr Hook has been driving ever since and believes he has covered about 1,000,000 miles in the score of cars he has owned.

absolutely sure of this, The Secretary said that the best which could be expected of the present Sino-American talks in Warsaw would be arrangements about practical problems, and not an agreement on questions of principle.

Principles

In the ambassiderial talks going on in Warsaw, Mr Dulles said there were principles involved in the situation which "we cannot expect to reconcile

nt those talks." This became clear, he added, during previous similar ambassadorial talks.

"But if we can get away from the question of principles, and get down to talking of some of the practical problems involved, maybe a solution can be found,' Mr Dulles said.

he was not aware of any "behind the scenes" talks simed at solving the Far East problem. Newport, Sept. 19.
Britain's graceful all-white
Sceptro slipped into the
choppy waters of Newport harbour today 18 hours challenging the States Columbia for the prized America's

Sceptre's young and agile crew, in R.A.F. blue, spent the morning rubbing down the sleek, unmarked hull to the texture of glass to enable her to slip through the water with a minimum of friction.

Sceptre's skipper, Lieutenant-Commander Gramam Mann, supervised the final overhaul in Newport boatyard, and when asked again about reports tont Sceptre's hull was cracked, laughed and made a gesture towards her unlined hull and keel, broken only by

scarlet waterline. With 2,000 square feet of sail, masts that tower nearly 50 feet into the air, and an overall length of almost 70 feet she represents Britain's bei hope of winning back the 100 can schooner, America, took away more than a century ago in the first such race, around the Isle of Wight,-Reuter,
